

Application No. 10/664,630  
Amdt. Dated: December 14, 2005

**Amendments to the Claims:**

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (Currently Amended): A ~~deflector type~~ wall mounted guard with means surrounding a wall mounted signaling device and providing bumper means for protecting ~~a~~ said device ~~attached to a wall~~ and having a depth extending from said wall and having a width and a height, the improvement comprising:

said wall mounted guard having connecting means attached to said wall and also having deflecting means adjacent said device attached to the wall and spaced a distance from said device to allow unobstructed access to said device for operation at all times and said deflecting means including means located away from said wall a distance at least equal to the depth of the device attached to said wall and said device being protected by said bumper means.

Claim 2 (Original) The wall mounted guard of claim 1, including:

said deflecting means providing an arcuate body with means extending away from said wall to thereby protect said device attached to said wall.

Claim 3 (Original) The wall mounted guard of claim 1, and said deflecting means including:

an arcuate body having a width extending at least the width of the wall mounted device being protected by said bumper means.

Application No. 10/664,630  
Amdt. Dated: December 14, 2005

Claim 4 (Original) The wall mounted guard of claim 1, and said deflecting means including:  
an arcuate body having a height at least the height of the device attached to said wall and  
being protected by said bumper means.

Claim 5 (Original) The wall mounted guard of claim 1, including:  
said connecting means for attaching the wall guard to said wall include fastener means  
attached to said wall at a location in vertical alignment with the device being protected by said  
bumper means.

Claim 6 (Original) The wall mounted guard of claim 1, wherein said deflecting means  
includes:  
first and second members with means located in horizontal alignment with said device  
being protected by said bumper means;

said first and second members having a height equal or greater than the height of the  
device being protected to thereby prevent damage to said device.

Claim 7 (Currently Amended) A wall mounted guard for protecting wall mounted fixtures such  
as switches, alarm pull boxes, thermostats and the like, and comprising cam guide means located  
adjacent said fixture and providing deflecting means extending from said wall to guide objects  
away from the wall and the fixture to thereby prevent damage to the fixture said guard having  
said deflecting means with mounting portions located adjacent to said protected wall mounted  
fixture to allow access to said fixture for operation thereof.

Application No. 10/664,630

Amdt. Dated: December 14, 2005

**Claim 8 (Original)** The wall mounted guard of claim 7, and including:

means attaching said wall guard in vertical alignment with said fixture.

**Claim 9 (Previously Presented)** The wall mounted guard of claim 7, and including:

means attaching said wall mounted guard in horizontal alignment with said fixture.

**Claim 10 (Original)** The wall mounted guard of claim 7, wherein said cam means includes:

a pair of cam members in horizontal alignment.
